

Full bodied, velvety, black cherries, rich and fresh
and opened 21 days ago.

FEBVRE
Original thinking in wine

It's time to get serious about wine.

It's no secret that wine is the fastest growing sector of the on-trade market and, as customers become more familiar with it, they're increasingly looking for better quality and more choice. Wine by the Glass from Febvre is the definitive wine storage and preservation system, allowing you the breadth of choice your customers demand and an increased margin every time you serve. It's the simple, maintenance-free, cost effective solution to tap the most lucrative market in the on-trade.

Advantages of "Wine By The Glass"

- Allows you to offer a greater choice of wines
- Customers can choose from wines at varied price levels
- Increased revenue from customers choosing premium wines
- Allows you to offer a choice of both still & sparkling wine

The Equipment - Le Verre de Vin

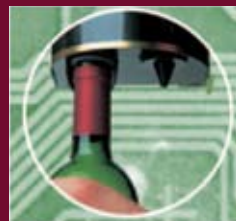

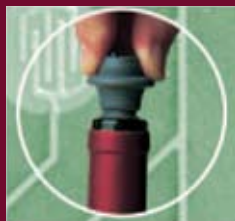

What is Le Verre de Vin?

Le Verre de Vin is a wine preservation system that keeps both still & sparkling wine fresh and in prime drinking condition for up to 21 days after opening.

How does it work?

Still Wine: Le Verre de Vin re-seals opened bottles in 2-6 seconds depending on the amount of wine remaining. It does this by extracting the oxygen out of the bottle to prevent wine from oxidising.

Sparkling Wine: For sparkling wine, Le Verre de Vin re-seals the bottle by placing a cap of CO₂ on top of the wine to keep it compressed.

Works by extracting air from the bottle, not by introducing nitrogen which can react with the wine

The “Barclay Bar” - by Le Verre de Vin

An all in one wine service station holding up to 32 bottles. The system contains split temperature compartments for Red and White Wine with preservation nozzles built into the front of the unit. - €5500 ex vat

Available: 1. Full Stainless 2.Black/Stainless 3.Black/Brass

Dimension:

H680mm x W830mm x D500mm
